Summary

MARTEL GMBH and the project partners are processing your data in compliance with the GDPR in the context of the NexusForum.EU project to:

- register you to the NexusForum.EU events and to populate participants lists,
- where applicable, set up networking activities for event participants,
- inform you about NexusForum.EU activities,
- provide access to resources,
- promote and document the NexusForum.EU activities,
- produce aggregated statistics

Your data will be kept no longer than five years after the completion of the project. You might be photographed or recorded for documentation and promotional purposes on the project and project partners web and social media handles. Data transfers outside the EU might happen, including to project partners located outside the EU, who will comply with the GDPR and to third parties. You have a right to view personal data, to rectification and, in some circumstances, to restriction of processing and to object. Contact hello.nexusforum@ri.se.

Introduction

You are invited to participate and contribute to the activities of the NexusForum.EU project that is co-funded by the European Commission under the Horizon Europe Programme.

Your participation is voluntary, you are free to withdraw at any time before or during the activities you are involved in by contacting the people mentioned in the current form.

Before you decide whether or not to take part, please take some time to read the following information carefully. Please, feel free to ask questions if more information or clarifications are needed using the contact details in the last section of this Sheet.

NexusForum.EU main scope

The shift from H2020 to Horizon Europe reflects the convergence of Cloud, Edge, and IoT technologies in the ICT industry, significantly impacting Europe at various levels. Future projects should capitalise on ongoing efforts and consolidate technology priorities outlined by the EU industry. The EU-funded NexusForum.EU project aims to help the transition of the community of EC-funded projects and related initiatives towards closer collaboration with the industry. The project combines research and policy along the Cognitive Computing Continuum, essential for expanding the ongoing CSAs, particularly EUCloudEdgeIoT. It will generate research roadmaps, foster collaboration, establish links with relevant organisations, promote EU research diversity, identify skill gaps, analyse crucial topics, and engage with research communities outside Europe.
